BeetleTracker

The scope of the website

1- Introduction

The BeetleTracker is a platform for IT professionals who are working in teams and help them to have a tool to manage the bugs of their projects.

2- Target audience

This platform is an effective tool to manage the bugs for :

a)   IT professionals.

b)   IT Students.

3- Website activities and objectives

We would like the general user to engage in the following activities on our website. Items are listed in order of importance:

- Create a new team or join an existing one .
- The user can invite others in the organization.
- Create a project and every member can invite others to this project.
- Members of the project add bugs for their teams; according to 4 levels of importance.
- The user can assign the bug to a certain team member or leave it for later in the main index.
- Every team has its own dashboard with an overview of debugging activity.
- A member can change the state of a bug from open to solved and it will automatically move to 'archived'
